### **GAS RESERVE REPORT**

“Jake Oil & Gas Consultants LLC”, have prepared a new report for Stealth Energy Inc. (the “Company” or “Stealth”) on the potential gas reserve of five drilled wells that were in production in the late 1980s and early 1990s, and that are located on Stealth’s gas leases in Stillwater County, Montana. These wells are generally proximate to the two successfully drilled wells (Hailstone #23-1 and Hailstone #23-2) that have yet to be flow tested.

The purpose of the report is to determine if a connecting pipe line to the Saga gas line is justified at this stage of development. The report is with respect to only four sections (2,400 acres) within the 32,286 net acres of prime gas leases the Company owns in Stillwater County. The report states in part: ***“All together the structure held 6.7 billion cubic feet of recoverable gas and after early production it still holds 6.1 billion cubic feet of recoverable gas.”***

Accordingly, the Company is currently negotiating rights of way to enable the construction of approximately 9 miles of connecting pipeline to the main Saga gas line.

*Stealth Energy Inc. is an exploration and production oil & gas company with its field office in Billings, Montana, USA. The company continues to develop its own oil and gas properties and is continuing to make acquisitions primarily within the states of Montana and Wyoming. For further information please contact Carlo Nigro at (604) 669-7831 or [stealthenergy@telus.net](mailto:stealthenergy@telus.net).*
