YEAR END DRILLING REPORT

On 1 June 2010 Stealth Energy Inc. (the “Company”) announced that it was implementing a drilling program in its recently acquired Trailblazer property in Montana. The full report on this drilling program is still in progress. However the company is able to announce the following: 22-1 DeJeager, in Rosebud County Montana was drilled to 5102 feet plugged and abandoned, 11-1 Murnion, in Petroleum County Montana was drilled to 2902 feet plugged and abandoned. The results, however, were considered successful in that significant data for the Heath prospect was provided. 7-1 Dexter, in Musselshell County was drilled to 4509 feet and a 5 1/2 inch production casing run to total depth. Currently the company is evaluating two sets of perforations in the Lower Tyler with a view to a “frac” in early 2011.

Robert Gardner Chairman states "This drilling program has been very successful by industry standards and the company is now planning two further drill sites in Musselshell. We look forward with optimism to the “frac” results from the Dexter and future planned drill sites in that County. Thereafter we will further develop in Petroleum County. The Trailblazer property has finally given the company its oil legs for serious company growth".

The Company has approved the issuance of 4,250,000 incentive options under its stock option plan at an exercise price of 25 cents to its officers, directors, employees, and consultants. This is the third issuance of options under the Stealth stock option plan, making the total options outstanding 6,255,000 and leaving 2,875,800 reserved for future issuance.

Stealth Energy Inc. is a producing oil & gas company with its field office in Billings, Montana, USA. The company develops its own properties and continues to seek and make acquisitions, primarily within Montana and Wyoming.
