

St-Georges and Focus Metals Join Forces to Evaluate Tétépisca's Graphite Potential

MONTREAL, Quebec, March 13, 2012 – St-Georges Platinum and Base Metals Ltd. (SX:CNSX; SXOOF:OTCQX; 85G:BSE) is pleased to announce the signing of a Memorandum of Understanding with **Focus Metals Inc. (FMS:TSX-V; FCSMF:OTCQX; FKC:FSE)** with regard to the graphite resource viability of two of St-Georges' Quebec properties.

Under the terms of the three-month agreement, Focus Metals will research and evaluate the potential of St-Georges' Tétépisca graphite property and assist St-Georges geological staff in evaluating the potential of multiple graphite occurrences found on the southeast extension of the company's Julie nickel-copper project.

Both properties are located on the Quebec North Shore. The non-binding arrangement gives Focus Metals a 120-day right of first refusal for the establishment of a joint-venture relationship with St-George for the future development of those properties.

Consequently, St-Georges geologists will acquire access to Focus Metals' geological team and their expertise gleaned from early-stage development of Focus Metals' Lac Knife, Quebec graphite deposit which, at 16%, remains the highest grade graphite deposit in the world.

"We are very pleased to have been invited to assist St-Georges in their initial geological determinations at Tétépisca and Southeast Julie," said Focus President and CEO Gary Economo. "Our accumulation of both geological and business experience at Lac Knife provides a template for evaluating pre-development."

St-Georges President and CEO Frank Dumas said: "Focus Metals is recognized in the mining development community as the 'go to' source for graphite. We're pleased to have teamed with Focus not only for their graphite-related geological experience, but their early-stage business development experience."

"The market is primed for new entrants to the graphite market, especially in Quebec. We expect we'll be in a better position to determine our course once the evaluation is completed," Mr. Dumas said.

About St-Georges

St-Georges is a junior Platinum, Palladium, Rhodium, Copper, Cobalt and Nickel explorer with projects in the Province of Quebec, Canada. Headquartered in Montreal, the Company's stock is listed on the CNSX under the symbol SX, the OTCQX under the Symbol SXOOF and the Berlin Stock Exchange under the symbol 85G. It owns the Villebon Copper-Nickel and PGEs property in Abitibi and a 100% interest in the Julie and Isoukoustouc Nickel-Copper-PGEs projects on the

Quebec North Shore. The company also owns a 100% interest in ten North Shore properties that constitute the Manicouagan constellation which are explored for Nickel, Copper, Platinum, Palladium and Graphite and 50% equity interest in 6 properties explored for graphite with Amseco Exploration, all the latter being on Quebec's North Shore near the deep-seaport town of Baie-Comeau.
