TALMORA DIAMOND COMPLETES \$165,000 NON-BROKERED PRIVATE PLACEMENT

(Toronto, December 29, 2010) Talmora Diamond Inc. (CNSX: TAI) is pleased to announce that it has completed a non-brokered private placement of 3,300,000 Units, comprised of 2,100,000 Hard Dollar Units and 1,200,000 Flow-Through Units, that were sold at \$0.05 per Unit, for gross proceeds of \$165,000 effective December 28, 2010. Each Unit consists of one common share and one-half of one common share purchase warrant. Each whole common share purchase warrant ("Warrant") entitles the holder to acquire one common share for \$0.16 until December 28, 2012. If during the term of the Warrants the common shares of Talmora trade at or above Can. \$0.25 for a period of 20 consecutive trading days, the Company may notify the warrant holder to exercise the Warrants at a date no later than 30 calendar days after this notification date or forfeit any unexercised Warrants at that time. All securities issued pursuant to the financing are subject to a four month hold period which expires on April 28, 2011. Insiders acquired a total of 1,820,000 Units in the financing.

The Company now has 36,982,679 common shares outstanding. On a fully-diluted basis after giving effect to the exercise of all outstanding share purchase warrants and incentive stock options granted under its stock option plan the Company would have 47,636,551 common shares outstanding.

The proceeds of the financing will be applied to fund exploration and for working capital.

Talmora holds 13 contiguous prospecting permits (577,153 acres) and 175 mineral claims (54,487 acres) straddling the 68th parallel on the east side of the Lena West diamond area of the Northwest Territories. Ten of the permits are in the Sahtu Settlement Region and three permits and all the claims are in the Inuvialuit Settlement Region.

Over \$75 million has been spent in the Lena West area by other companies with the recovery of numerous kimberlite indicator minerals (KIMs) and an unprecedented 18 diamonds in field samples. No kimberlites have been found except for the Darnley Bay and the Dharma kimberlites on a well defined favourable structure that includes the Talmora property.

Sampling on the Talmora property shows a strong correlation between KIMs in till samples and magnetic anomalies with characteristics of kimberlite pipes. The majority of Lena West KIMs found by others to the west of Talmora are very similar to those from the Talmora property but differ from those of the Darnley Bay and Dharma properties. There is therefore every reason to believe that the Talmora property may be the source of the abundant KIMs and diamonds to the west.

Talmora has targets ready for drilling. A drill program will cost a minimum of \$1-2,000,000 and the funds for the drill program will be raised in 2011 after the targets have been prioritized and the necessary permits have been obtained.

The technical information contained in this release was compiled by Alan W. Davies, P.Eng., P.G., who is the Vice-President of Exploration for Talmora. Alan W. Davies is a qualified person as defined by National Instrument 43-101.
