MONTHLY PROGRESS REPORT**

Name of CNSX Issuer:	Triple Dragon Resources Inc.
Trading Symbol:	TDN
Number of Outstanding Quoted Securities:	24,425,000
Date:	July 3, 2009

**Report on Business**

1. Triple Dragon Resources Inc. (the "Issuer") is a junior mineral exploration and development company with three properties located in the Northwest Territories, Canada:

The Murray Property, encompassing approximately 2,479 acres, is located directly southeast of Murray Lake within the south-central part of the Northwest Territories. The Murray Property is about 80km northeast of Yellowknife, NWT. Numerous gold bearing quartz veins have been identified on the Murray Property, with the distribution of gold mineralization appearing to be structurally controlled, as many of the host quartz veins are found along the axial plane of distinct folds. The Murray Property has good potential for the discovery of significant gold mineralization and is considered under-explored for turbidite-hosted gold deposits.

The Camlaren Property, consisting of two mineral claims covering approximately 2,425 acres (981 hectares), is located 80 km northeast of Yellowknife and just 6 km east-southeast of the Murray Property. The Camlaren Property includes the past producing Camlaren Gold Mine, as well as other gold showings. The geology of the Camlaren Property is similar to that of the Murray Property. The claims are underlain by metaturbidites of the Archean Burwash Formation, and the area is considered favorable for turbidite-hosted quartz vein gold deposits. Gold mineralization is commonly accompanied by sulphides and appears structurally controlled, contained within veins formed by folding.

The May Property, consisting of one mineral lease covering 100.5 acres (40.67 hectares), is located 5 km south-southwest of the Camlaren Mine. The May Property was acquired from prospector Dave Nickerson in May, 2009. In 1981, Echo Bay Mines Ltd. drilled eleven diamond drill holes at the May Property, intersecting high grades of gold within a quartz vein. Visible gold was intersected in four of the drill holes with values as high as 8.78 oz/ton gold (301.03 g/t) over 1.5 feet, encountered in hole M81-7 from 81.5 to 83.0 feet. Additional drilling was recommended by Echo Bay geologists to

test the vein, which is open to the south and at depth. The May Property is underlain by steeply dipping, isoclinally folded Archean greywacke and slates. Rock types, structure, and quartz veining are similar to those at the Camlaren Property.

2. In June, 2009, the Issuer announced the acquisition of the Camlaren and May Properties. The Issuer intends on conducting exploration on the Camlaren Property this summer to follow up on historic showings and to further assess the mineralization potential of the property. This will include a property-wide program of field mapping and sampling with an emphasis on known mineralized showings and trends. The current condition of the Camlaren Mine shaft will also be reviewed and tailing piles near the mine will be sampled. A compilation of all available historic data on the area is ongoing. Management of the Issuer was also focused on reviewing other potential properties for acquisition.
3. There were no other drilling, exploration or production programs and no new acquisitions of any properties in June, 2009, other than as described above.
4. The Issuer did not commence any exploration programs in June, 2009, other than as described above, nor were any drilling, exploration or production programs amended or abandoned during the month of June, 2009.
5. The Issuer did not enter into any new business relationships in June, 2009.
6. No agreements or contracts expired or were terminated by the Issuer in June, 2009.
7. The Issuer did not acquire or dispose of any of its assets in June, 2009, other than as described above.
8. The Issuer did not acquire or lose any customers in June, 2009.
9. There were no new developments on the Issuer's intangible products in June, 2009.
10. The Issuer did not hire, terminate or lay off any employees in June, 2009.
11. The Issuer was not involved in any labour disputes in June, 2009.
12. There were no legal proceedings to which the Issuer was a party in June, 2009.
13. There was no indebtedness incurred or repaid by the Issuer in June, 2009.
14. The Issuer issued the following securities in June, 2009:

<b>Security</b>	<b>Number issued</b>	<b>Details of Issuance</b>	<b>Use of Proceeds</b>
Nil			

15. In June, 2009, there were no loans to or by Related Persons to the Issuer.
16. The Board of Directors and officers of the Company are:

David Hodge – Director, President and CEO  
Shaun Ledding – Director and Chief Financial Officer  
Jenna Hardy – Director  
Alicia Milne – Corporate Secretary

17. Trends that may impact the Issuer:
- a. The Issuer's properties are currently in the exploration stage only and are without known bodies of commercial ore or minerals. Development of the properties will only follow upon obtaining satisfactory results of property assessment.
  - b. Mineral exploration and development involves a high degree of risk and few properties which are explored are ultimately developed into producing mines. There is no assurance that the Company's exploration and development activities will result in any discoveries of commercial bodies or ore or minerals. The long-term profitability of the Issuer's operations will be in part directly related to the cost and success of its exploration and subsequent evaluation programs, which may be affected by a number of factors. These include the particular attributes of the mineral deposit including the quantity and quality of the ore, proximity to or cost to develop infrastructure for extraction, financing costs, mineral prices and the competitive nature of the industry.
  - c. Governmental regulations including those relating to prices, taxes, royalties, land tenure and use, the environment and the importing and exporting of minerals are of key importance to the Issuer. The effects of these factors cannot be accurately predicted, but any combination of them may result in the Issuer not receiving an adequate return on invested capital.

**Certificate of Compliance**

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof, there was no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to CNSX that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all CNSX requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.
