

FORM 7
MONTHLY PROGRESS REPORT

Name of CNQ Issuer: **EXCALIBUR RESOURCES LTD.** (the "Issuer").

Trading Symbol: **XBR**

Number of Outstanding Listed Securities: **32,588,465**

Date: **February 4, 2011**

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by the CNSX Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the CNSX.ca website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the CNSX Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Company is a junior exploration mining company focused on the discovery, development and mining of economically viable precious and base metal mineral resources in North America. To date these include the Silver King Mine property near Nelson BC, adjacent land positions on strike of the Silver King property (Cariboo Claims) and the Sturgeon Lake claims, volcanogenic massive sulphide and gold-copper targets comprising 107 square kilometers in NW Ontario. The Company also has a 49% joint venture interest in a gold production project on the 133 hectare Catanava property within the Municipality of Pinos, State of Zacatecas, Mexico.

2. Provide a general overview and discussion of the activities of management.

The Company received its Mines Act Permit which authorizes exploration activities on its Silver King and Cariboo properties. Excalibur intends to launch an exploration program that will include magnetic and resistivity surveying, geological mapping, trenching as well as 2600 metres of drilling on the properties in the summer of 2011. The Silver King property contains the past-producing silver-copper Silver King Mine located 7 km south of

Nelson B.C. This mine produced 15 million pounds of copper and over 4 million ounces of silver (mostly between 1898 and the WW1). A pre-NI 43-101 high-grade silver-copper resource was calculated in 1967. In the fall drill program of 2009 a new vein was found and the drill program continued to hit high-grade mineralization with assays reported up to 657 g/t Ag with 3.6% Cu. The Silver King property has several attractive exploration targets, as only a portion of the property has been thoroughly explored. Potential for high-grade resources at Silver King remains: 1) in the extension of mineralization at depth, 2) along strike of known mineralization, and 3) in the demonstrated possibility of discovering new vein systems, both cross-cutting and parallel to the Main Silver King shear. A goal for 2011 will be to define a resource at this property. At the adjacent Cariboo property, grab samples in 2008 returned gold values up to 12 g/t. The goal for 2011 will be to systematically trench this area.

Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

The Company is awaiting assay results from its fall drilling program at Sturgeon Lake, Ontario.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

No drilling, exploration or production programs have been amended or abandoned.

5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

Not applicable.

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

Not applicable.

7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.

Not applicable.

8. Describe the acquisition of new customers or loss of customers.
Not applicable.
9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trademarks.
Not applicable.
10. Report on any employee hirings, terminations or lay-offs with details of anticipated length of lay-offs.
Not applicable.
11. Report on any labour disputes and resolutions of those disputes if applicable.
Not applicable.
12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.
None.
13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.
None.
14. Provide details of any securities issued and options or warrants granted.
No securities have been issued and no options or warrants granted.
15. Provide details of any loans to or by Related Persons.
Not applicable.
16. Provide details of any changes in directors, officers or committee members.
Not applicable.
17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

Resource exploration and development is a speculative business and involves a high degree of risk, including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but from finding mineral deposits which, though present, are insufficient in size to return a profit from production. The marketability of natural resources that may be acquired or discovered by the Company will be affected by numerous factors beyond the control of the Company. These factors include market fluctuations, the proximity and capacity of natural resource markets, government regulations, including regulations relating to prices, taxes, royalties, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in the Company not receiving an adequate return on invested capital. The great majority of

exploration projects do not result in the discovery of commercially mineable deposits of ore.

Even if commercial quantities of mineral deposits are discovered by the Company, there is no guarantee that a profitable market will exist for the sale of the metals produced. Factors beyond the control of the Company may affect the marketability of any substances discovered. The prices of various metals have experienced significant movement over short periods of time, and are affected by numerous factors beyond the control of the Company, including international economic and political trends, expectations of inflation, currency exchange fluctuations, interest rates and global or regional consumption patterns, speculative activities and increased production due to improved mining and production methods. The supply of and demand for metals are affected by various factors, including political events, economic conditions and production costs in major producing regions. There can be no assurance that the price of any mineral deposit will be such that any of its mineral properties could be mined at a profit.

The Company does not presently have sufficient financial resources to undertake by itself the exploration and development of all of its planned exploration and development programs. The development of the Company's properties will therefore depend upon the Company's ability to obtain financing through the joint venturing of projects, private placement financing, public financing or other means. There can be no assurance that the Company will be successful in obtaining the required financing. Failure to raise the required funds could result in the Company losing, or being required to dispose of, its interest in its properties. In particular, failure by the Company to raise the funding necessary to maintain its properties in good standing could result in the loss of its rights to such properties.

In recent years, global securities markets have experienced a high level of price and volume volatility, and the market price of securities of many companies, particularly those considered exploration and development stage companies, have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual and extreme fluctuations in price will not occur.

The Company is very dependent upon the personal efforts and commitment of its existing management who are not full-time employees of the Company. To the extent that management's services would be unavailable for any reason, the Company's operations could be disrupted.

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there were is no material information concerning the Issuer which has not been publicly disclosed.

3. The undersigned hereby certifies to CNSX that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all CNSX Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.

Dated February 4, 2011.

"Dianne Szigety"

Corporate Secretary
