GLOBAL CANNABIS APPLICATIONS ANNOUNCES CANNALIFE APP ON GOOGLE PLAY

Vancouver, British Columbia, Canada, October 12, 2017 – Global Cannabis Applications Corp. (“**GCAC**” or the “**Company**”) (CSE: APP, FSE:2FA, OTCQB: FUAPF), a leading developer of innovative data technologies for the cannabis industry, is pleased to announce the submission of the CannaLife app to the Google Play Store.

CannaLife Social Engagement App for Medical Cannabis

Targeted towards both active and non-active medical cannabis users, CannaLife was designed to create conversation, sharing and education on a single social platform. Built upon the highly successful Opinit code base, CannaLife shows users trending tags, trending emoticons, and other user’s posts. Users can search for people to follow, tags to subscribe and communities to join or create their own. The app also allows users to see what activities they have been doing and see activities of people they are following. Communities created are listed by recent actions and by popularity. App users also have the ability to create posts taking a snapshot from a web page.

Proprietary Web-grabber UI

CannaLife’s proprietary Web Grab function is designed to search only cannabis related content, plus users can create posts by taking a picture or using any existing picture. Posts can then be tagged with sentiment driven emoticons and associated with specific cannabis orientated communities. Users can view their own activity in their profile, manage push notifications, and invite friends from Facebook and contacts in the Settings Section.

Blockchain and A.I. Ready

CannaLife is part of the Citizen Green family of technologies including mobile applications, artificial intelligence (AI) and predicative analysis, blockchain infrastructure, asynchronous video chat, and Digital Reward Tokens based on user engagement. CannaLife will be available in the EU, Latin America, Australia, Canada and the United States. Weekly updates of products and providers are automatically uploaded to CannaLife. Users must be of legal age in each region to use the application. Upon final approval, CannaLife will be available as a free app on Google Play.

CannaInvestor Magazine

“We are pleased to announce the launch of CannaLife to Google Play” states CEO, Brad Moore. “As recently highlighted in CannaInvestor Magazine, CannaLife is extremely unique as it has a specific search engine designed to generate all search returns on anything to do with medical cannabis. This continues to promote education and knowledge in an industry much stigmatized, bringing together the power of people from app users to regulators, doctors and pharmacists. With this type of technology, GCAC will be the only data company in the medical cannabis space to offer an end to end data aggregation and user delivery solution.”
