The Company's losses in the past, as well as in the near future, are not subject to seasonality. The fluctuation within the past eight quarters was mainly driven by incidental events such as:

- a) The Company has recorded net earnings in 2015 Q1 - an improvement comparing to other quarters which show quarterly losses. This improvement is a result of recording a non-recurring gain of CHF 212,565 from debt settlement at discount.

As the Company has disposed its operating subsidiary during fiscal 2015 and is currently seeking new business opportunities, readers should be cautioned to rely on the Company's past results to predict the future operating results of the Company.

Year ended October 31, 2015 (the "Fiscal 2015")

Net income in 2015 was CHF 50,690 comparing to a loss of CHF 162,848 in 2014, an improvement of CHF 213,538.
