

**FORM 51-102F3
MATERIAL CHANGE REPORT
UNDER NATIONAL INSTRUMENT 51-102**

Item 1 Name and Address of Company

Pasinex Resources Limited
36 Toronto Street, Suite 1000
Toronto, Ontario
M5C 2C5

Item 2 Date of Material Change

April 6, 2016

Item 3 News Release

A News Release was disseminated on April 6, 2016 through Marketwired.

Item 4 Summary of Material Change

Pasinex DSO Zinc Production Continues at Pinargozu; Recent Lot Sales Includes Sulphide Zinc Mineral Product.

Item 5 Full Description of Material Change

For a full description of the material change, please see the attached News Release.

Item 6 Reliance of subsection 7.1(2) of National Instrument 51-102

N/A

Item 7 Omitted Information

N/A

Item 8 Executive Officer

Item 9 Date of Report

April 6, 2016

Pasinex DSO Zinc Production Continues at Pinargozu Recent Lot Sales Includes Sulphide Zinc Mineral Product

TORONTO, ON – April 6, 2016 – Pasinex Resources Limited (CSE: PSE) (FSE: PNX) (the “Company” or “Pasinex”) today announced it has completed two separate lot sales of high grade direct shipping zinc mineral material from its Pinargozu zinc mine in Adana province, Turkey. One lot was an oxide zinc mineral (predominantly the zinc mineral smithsonite), while the second lot sale was a sulphide mineral (sphalerite) which was also high grade direct shipping material.

Steve Williams, President and CEO of Pasinex commented, “These latest lot sales included some sulphide mineralized material. This is significant because sulphide mineralization has greater concentration of zinc due to this being predominantly a massive Zn mineral called sphalerite. Therefore, this has even further improved the overall grade of the product we are selling. This is the first sulphide zone we have mined at Pinargozu. What this means to the Joint Venture is improved cash flow due to a higher overall grade of the DSO (direct shipping ore). It also is important geologically because we are now starting to see sulphides in a system that has, to date, been all oxide mineralization. Naturally, we are very excited to have encountered the sulphide zone.”

The Horzum JV has been operating profitably for the first three months of this year and continues to exceed the plan. Ten mining faces have now been opened and the Company will continue ramping up production by mid-year.

About Pasinex

Pasinex Resources Limited (CSE: PSE; FSE: PNX) is a base-metal and precious-metal focused Company with a goal to build a mid-tier international mining company. The Company’s initial priority is to build a prospective portfolio of base-metal opportunities in Turkey. The Company has a strong technical management team with many years of experience in mineral exploration and mining project development. The focus of Pasinex is to build a mid-tier zinc company based on their Turkey zinc projects.

The Pinargozu mine is included in the 50-50 company, Horzum Arama Isletme AS (Horzum AS), which is a corporate joint venture between Pasinex and Turkish mining house, Akmetal Madencilik San ve Tic. AS (Akmetal AS). Akmetal A.S is one of Turkey’s largest family-owned conglomerates with the past-producing Horzum zinc Mine nearby.
