

**QUADRON INTRODUCES THE NEXT GENERATION
CO2 CANNABIS EXTRACTION SYSTEM:
"THE BOSS"**

Vancouver, British Columbia, September 27, 2017 – Quadron Cannatech Corporation (the "Company" or "Quadron") – (CSE: QCC) is pleased to introduce its proprietary, automated, next generation CO2 Extraction System – the "BOSS".

The BOSS combines proprietary max-flow CO2 innovation with advanced thermodynamics, automated features, and an exclusive plug and play design. The BOSS requires only a fraction of the space and energy requirements compared to other systems on the market and is built to simplify extraction with the benefits of automation and data analytics. The system is designed with industry needs in mind to reduce costs and increase profit margins for extract production.

THE BOSS EXTRACTION SYSTEM ADVANTAGES

- Automated system with remote monitoring and control features
- Software collects, stores, and analyzes data for Research & Development
- Programmable cycles - maximizing extraction and separation efficiency
- Plug and Play self-contained system with no external setup required
- Simplified assembly with only two pieces of equipment to set-up, two plugs and four hoses to connect
- Integrated heat exchanger with proprietary advanced thermodynamics
- High precision operating parameters for accurate performance
- Ability to collect extract during runtime

Rosy Mondin, CEO & President of Quadron, states: "We engaged with a broad base of industry participants and listened to their needs. Utilizing military-grade craftsmanship, precision engineering, and state-of-the-art automation, the BOSS is an advanced CO2 Extraction System, designed to deliver the most advanced CO2 extraction technology."

Ms. Mondin continues, "There is an extraordinary need for innovation, automation, analytics, and predictable recoveries in the cannabis extraction industry. The BOSS is a revolutionary system that will no doubt disrupt the industry and build a new, worldwide benchmark for industry standards moving forward."
