

PRESS RELEASE RENFORTH RESOURCES

#304 – 65 FRONT ST. E TORONTO, ON M5E 1B5

Renforth Announces Additional Malartic West Property Acquisition

Toronto – Nov. 25, 2015 – Renforth Resources Inc. (CSE: RFR) (“Renforth” or the “Company”) is pleased to announce the 100% acquisition of 4875 hectares of additional gold bearing claims adjacent to, and also named, the Malartic West Property. Acquired from private holders for total consideration of 2 million shares of Renforth and 2 million common share purchase warrants exercisable for a period of 2 years at a price of \$0.05, this property is the host of several drilled gold intersections and is contiguous to the Agnico/Yamana Canadian Malartic Mine.

“Renforth is now a significant holder of gold-bearing property in the Cadillac and Malartic Townships, Quebec, these properties include current and historic resources, current exploration targets, surface and drilled gold occurrences and highly prospective ground, both on the Cadillac Break and in the Pontiac Sediments to the south of the Break. Both the Cadillac Break and the Pontiac Sediments are the hosts of several operating mines in the immediate vicinity. The property size we have attained will allow us to explore on a larger scale basis and approach our findings on a combined basis” states Nicole Brewster, President and CEO of Renforth.

Renforth has commenced a fundraising effort through the offering of Quebec flow-through eligible units, the use of proceeds from this effort will be exploration on the Parbec Property where Renforth has presented a current exploration target for the historically known Camp Zone deposit. In addition Renforth has identified the occurrence of gold in three additional

lithologies on the property, these lithologies have never been included in any previous historic resource, nor are they included in the current exploration target. Renforth has further determined that the existing decline at Parbec, designed to reach the tuff horizon in the Camp Zone, will have crossed through these additional gold bearing lithologies, therefore providing ease of future access.

Technical information presented in this press release has been reviewed and approved by Brian H. Newton P.Geol, a “qualified person” pursuant to the guidelines laid out in National Instrument 43-101.

ABOUT RENFORTH

Renforth Resources Inc. is a Toronto-based gold exploration company with interests in two of Canada’s gold exploration camps. In the Cadillac-Malartic Gold Camp the Company holds the New Alger project, with an inferred resource of 237,000 ounces of gold above a depth of 200 metres contained in 3,505,000 tonnes with a grade of 2.1g/t Au using a cut-off of 0.75 g/t Au (see press release July 17, 2014) as calculated by Brian H. Newton P.Geol and Philip Burt P.Geol, which is located on the Cadillac Break outside of Cadillac, Quebec and an option to purchase 100% of the Parbec Property from Globex Mining Enterprises Inc. (GMX-TSE), a historically identified gold occurrence with more than 100 drillholes completed and a ramp into the mineralization in place located outside of Malartic, Quebec, contiguous to the Canadian Malartic open pit mine. In Ontario the Company has the right to earn a 55% interest in the Nixon-Bartleman project, located on the Porcupine-Destor fault in the West Timmins Mining area, another historic gold occurrence with a couple of old shallow pits onsite and a history of past drilling which has not yet defined the gold occurrence.
