Vancouver, B.C. – (October 31, 2016) THC BioMed Intl Ltd. (“**THC**” or the “**Company**”) is pleased to announce that due to the high demand for clone shipper products THC has entered into an exclusive agreement with Clone Shipper for the distribution rights for all of Canada. The two companies will continue to work toward an agreement for THC to purchase Clone shipper, a U.S. based company, specializing in packaging products used to transport live plants. The distribution agreement is for a period of two years and THC paid Clone Shipper \$75,000 for the rights.

“In order to meet immediate demand for the product, we have entered into this distribution agreement so that clone shipper is made available to the Canadian market place. THC has injected USD\$ 75,000 into Clone Shipper for general working capital and to have subtle changes made to the design of the device to ensure it meets regulatory requirements.”

“Clone Shipper is an essential component required to be able to transport controlled, live plants in compliance with regulatory requirements. Clone Shipper ensures your plants arrive healthy & stress free,” commented John Miller, President and CEO of THC.

Clone Shipper products will be available on the 1st December 2016 for sale through www.thcbiomed.com or www.cloneshipper.com.

THC will continue to protect shareholder value by using existing infrastructure within the market place to ensure swift delivery of product to registered patients. THC will expand its own assets upon gauging actual market demands. Research has concluded that there is sufficient infrastructure to cater to current demand.

Branding and product development remain our top priority and we will work to bring to market a delivery system that is effective and safe for the consumer.

THC continues to pursue the acquisition of Clone Shipper. Management believes that purchasing Clone Shipper would allow THC to penetrate the U.S. and the International Cannabis market, while remaining in compliance with the U.S. and International laws by not dealing with cannabis where cannabis remains illegal.”

“The Global demand for securely shipping live plants is increasing with the legalization of Medical Cannabis. This is the early formation of the mark we intend to make on the international cannabis market place.” announced John Miller, THC BioMed Intl CEO and President.

THC management believes that Clone Shipper is currently the only device that meets Canadian and Federal International laws governing the transportation of controlled, live plants.

THC intends to strengthen the patents protecting the Clone Shipper device and will ensure that this invention is protected under international laws.

Clone Shipper products are currently available for sale at gardening supply outlets throughout the USA. Clone shipper is also available on popular sites like Amazon.com. International online sales and more information on the company can be found at www.cloneshipper.com

Management will continue to employ fiscal discipline as we asses and strategically move forward in building an international vertically integrated Cannabis conglomerate. Management continues to work diligently to increase shareholder value and meet the milestones it has set out to shareholders.

THC's vision is to be on the leading edge of scientific research, development of products and services related to the medical cannabis industry while creating a standard of excellence. As the industry develops, it will become more important to focus on scientific research and development of products and services related to medical cannabis. Management believes THC is well-positioned to be in the forefront of this rapidly growing industry.
