VANCOUVER, December 20, 2017 – THC BioMed Intl Ltd. (“THC” or the “Company”) (CSE:THC) announces that its subsidiary, THC2GO Dispensers, has officially submitted its application to operate cannabis retail stores in the province of Manitoba.

THC is also pleased to announce that Health Canada has amended THC’s ACMPR license to include 4 additional Grow Rooms. These additional Grow Rooms will allow THC to ramp up production, substantially adding an additional 400kg per annum. THC expects in the next few months to be the first Licensed Producer to offer a consistent supply of 21 different strains. The 4 Grow Rooms went into production on Friday the 15th December 2017.

THC further announces that it has entered into negotiations to purchase a greenhouse business in Ontario, Canada’s most populated province. The greenhouse business has been operating for more than 20 years and is well suited for growing cannabis. Successful completion of the acquisition would immediately give THC 100,000 square feet grow capacity with both facilities combined and an expansion capability of 300,000 square feet.

THC is further pleased to announce that it has had its facility inspected for Good Production Practices to enable the export of products to the European Union. We expect positive results from the inspection and hope to receive certification soon.

As legalization of cannabis sets in globally, we have seen a rapid demand for our cannabis products by the international market.

We are very satisfied with the progress we have made in 2017 and expect that our company outlook will demonstrate the rewards of our hard work. We take this opportunity to thank our shareholders for their patience and support. We wish you all a safe and festive Holiday Season

About THC

THC's vision is to be on the leading edge of scientific research, development of products and services related to the medical cannabis industry while creating a standard of excellence. As the industry develops, it will become more important to focus on scientific research and development of products and services related to medical cannabis. Management believes THC is well-positioned to be in the forefront of this rapidly growing industry.
