VALENS GROWWORKS ANNOUNCES ISO 17025 ACCREDITATION

Kelowna, B.C., June 14, 2018 –Valens GroWorks Corp. (CSE: VGW) (the “Company” or “Valens”), a multi-licensed vertically integrated provider of cannabis products and services utilizing proprietary extraction processes, is pleased to announce that its wholly-owned subsidiary Supra THC Services has obtained ISO 17025 accreditation for cannabis testing. It is the first Dealer’s License using cannabis as it’s matrix in Canada to achieve this accreditation.

ISO 17025 accreditation scope includes methods for cannabinoids, pesticides, toxic metals, terpenes and residual solvents. The ISO 17025 standard, *General requirements for the competence of testing and calibration laboratories*, has become the international reference for testing and calibration laboratories wanting to demonstrate their capacity to deliver trusted results. The International Standard, published jointly by ISO (International Organization for Standardization) and IEC (International Electrotechnical Commission), contains a set of requirements enabling laboratories to improve their ability to produce consistently valid results, by specifying the general requirements for the competence, impartiality and commitment to continuous improvement of the laboratory’s operations.

“I am very proud of our team. It is critical that all cannabis testing labs demonstrate that they can achieve similar performance standards so that consumers can trust that products tested are safe. Transparency is essential in this sector, and we are committed to help lead the way. Securing testing results from an ISO 17025 accredited laboratory is the best way for producers to ensure that they are producing high-quality, safe products. I would like to see Health Canada mandate that all licensed testing labs demonstrate that they can meet a similar standard.” commented Dr. Rob O’Brien, Valens’ CSO.

About Valens GroWorks

Valens GroWorks Corp. is a vertically integrated provider of Canadian cannabis products developed from our proprietary extraction techniques, with three wholly-owned subsidiaries located in and around Kelowna, BC. Subsidiary Valens Agritech has initiated cannabis production, processing and sales under a Health Canada Dealer’s Licence, which includes a supply agreement with Canopy Growth Corporation under their extensive CraftGrow distribution network. Subsidiary Supra THC Services is a Health Canada licensed cannabis testing lab providing sector-leading analytical services and has partnered with Thermo Fisher Scientific to develop a Centre of Excellence in Plant Based Medicine Analytics. Subsidiary Valens Farms is in the process of becoming a purpose-built facility in compliance with European Union (EU) Good Manufacturing Practice (GMP) standards, ensuring the product from this facility can be exported anywhere in the world where Cannabis is nationally legal for medical or adult usage purposes.
