It is designed as an ongoing process aimed at reducing our operational costs while safeguarding our revenue streams by concentrating our efforts on our most profitable operations, and we have now witnessed a remarkable 53% decrease in losses between Q3 2022 to Q3 2023 and an improvement of 54% in the Adjusted EBITDA loss in Q3, 2023 compared to Q2, 2023. This significant improvement demonstrates a positive trend in the company's financial performance over the past year.

We are proud to say that this has successfully brought us to a situation where we believe we can accelerate our operations in a highly profitable manner. We are rapidly approaching the break-even point in the short term, and we are laying the foundation for sustained cash flow positivity in the long term, which will be

invested in boosting our marketing using our AI marketing capabilities with the expectation to create exponential growth," commented Yossi Nevo, CEO of Spetz. "We believe that this strategic transformation has the potential to create the ideal environment for our company's value to surge and would ultimately benefit our investors and make them exceptionally pleased with our progress," Mr. Nevo added.
