**FOR IMMEDIATE RELEASE    Symbols: CSE: VPN, OTCQB: SRBBF, Frankfurt: 6GQ**

## **VPN Technologies sees increase in VPN users**

Vancouver, British Columbia, Canada – March 20, 2020 – **VPN Technologies Inc.** (CSE: VPN, OTCQB: SRBBF, Frankfurt: 6GQ) (“VPN Tech” or “the Company”) reports an increase in users to its BladeVPN.com virtual private network service.

VPNs provide an encrypted connection that allows users to securely connect to networks over the public internet.

President and CEO Paul Dickson states “VPN services across the board have seen massive growth in the past 48 hours primarily due to businesses requesting employees to work from home to reduce possible exposure to the novel coronavirus CoVid-19. Mr. Dickson adds “We’ve received requests for bulk user accounts as high as 300 users for a single business client.”

[S&P Global Market Intelligence](#) issued a report dated March 18<sup>th</sup>, 2020, commenting that "Other VPN providers contacted by S&P Global Market Intelligence confirmed that they are experiencing similar trends."

Garrett Bekker, principal security analyst at 451 Research, said the unprecedented volume of employees working from home could place enormous strains on many firms' remote access infrastructure, which could have both positive and negative effects on the VPN market.

The positive is increased sales and revenue. "However, sustained reliance on VPNs can also expose their limitations, and perhaps force firms to re-think their long-term remote access plans," Bekker said.

VPN Technologies remains committed to assisting those requiring a VPN and is offering free service for one year to individuals registering on the [BladeVPN.com](https://bladevpn.com) website using promo code “FREEVPN” on the One Year Unlimited Plan.
